

The scatter plot displays the relationship between the 'Top Five Sales Amount' (x-axis) and the 'Sales Amount' (y-axis). Both axes are scaled by  $10^{13}$ . The x-axis ranges from 0.0 to 1.2, and the y-axis ranges from 0.0 to 1.2. The data points are concentrated in a dense vertical cluster near the y-axis, indicating that most sales amounts are very low, even though the top five sales amounts vary. There are a few outliers at higher values, including one point near (1.2, 1.2).
